

Hi,

Congratulations on reaching the Assignment round of this paid internship at BeyondChats!

Through this assignment round, we want to evaluate your coding skills.

ALL THE BEST!

Assignment:

Intercom - one of our competitors is the industry leader in the chatbot and customer support industry.

Here is a demo video showcasing some functionalities of Intercom's AI-enhanced admin panel:

<https://drive.google.com/file/d/1WVvh4VmKJQ6jislbfutVmmeZj7luD4c/view?usp=sharing>

Your assignment is to replicate as much of the UI and functionality as showcased in the demo video above.

Evaluation Criteria:

1. Color scheme, theme, UI: 5 pts
2. How well have you replicated the UI & Functionality from the demo video: 10 pts
3. Desktop UI: 5 pts
4. Mobile Responsiveness: 10 pts
5. Transitions & Animations: 5 pts
6. Intuitiveness: 5 pts
7. WOW factor: 5 pts
8. Coding best practices and readability: 10 pts

Notes:

1. You have till Saturday end-of-day (24 May) to complete this assignment.
2. We understand that you may have your college or other commitments and so there may not be enough to do complete justice to the assignment or showcase the best of your skills.

But please try to complete the assignment to the best of your abilities in the given time.

3. If time is limited, focus on UI/UX & responsiveness above all else.
 4. Use dummy data wherever required.
 5. You are free to use any libraries as long as your code is built using Javascript-based frameworks like ReactJS or NextJS.
 6. Your final submission should be a Github project URL which contains a ReadMe file describing your submission. **The ReadMe should also contain the link to the live, deployed website.**
 7. Please make sure your Github project is public so that we can evaluate your submission with ease.
 8. You own complete rights to your code and we promise to not use it for any purposes unless we select you for the position.
 9. For any queries, please email us at contact@beyondchats.com
